

MMC IPMI software for AMCs

Key Features

- Complete, IPMI compliant MMC for AMCs
- No upfront costs
- No royalties
- Reference design schematic

Description:

Complete, IPMI compliant, MMC software solution that allows quick development of Advanced Mezzanine Cards without prior IPMI knowledge. The MMC software provides all necessary IPMI functionality required by MicroTCA(uTCA/MTCA) specification allowing easy and fast development of AMCs. It is delivered on a M16C62P pre-programmed microcontroller accompanied by reference design schematic and documents.
